

Safety Goggles

uvex carbonvision

Available from
February 2010

uvex carbonvision · 9307

The intelligent use of ultra modern materials and manufacturing technologies enables uvex to design frames which combine reduced size/volume and high mechanical resistance. uvex carbonvision provides the wearer with unparalleled comfort levels despite the very high level of mechanical stability. The TPU layer is permanently fixed to the frame, ensuring a perfect individual fit and it's easy to clean and maintain. The uvex carbon vision, weighing just 46 gr is undoubtedly one of the lightest wide-vision goggles on the market, enabling the wearer to work for longer periods without the distractions and problems caused by discomfort, thereby increasing his or her productivity.

The newly developed supravision extreme and supravision performance coating technologies prevent the goggles from steaming up, even in the most demanding conditions (see page 16).

uvex carbonvision goggles are recommended for protection against dust, liquid splashes and mechanical hazards. The goggles are ideal for wearing with disposable respirators and bump caps.
